

EPOS BAT Advanced Course

Porto, Portugal: 5-6 February 2026

Paediatric Bone & Joint Infection

Highlights

- Key Knowledge on Bone and Joint Infection
- Septic Arthritis
- Acute, Subacute and Chronic Osteomyelitis
- Surgical Site Infection
- Management of Sequelae
- Large Bone Defects
- What To Do With Implants

Methods of education

- Theoretical lectures
- Clinical case discussions
- Brains-on workshops

Welcome

Dear colleagues and friends,

It is with great enthusiasm that we invite you to join us in the EPOS BAT Advanced Course – Pediatric Bone and Joint Infection in the beautiful city of Porto, February 5-6, 2026.

Bone and joint infections affect many children of different ages and may have devastating consequences. A sound understanding of the pathology, diagnosis, and treatment is key to decreasing the morbidity and achieving the best outcomes. We will dedicate 1.5 days to sharing their insights and expertise in a comprehensive program including theoretical lectures, case discussions, and workshops.

We are proud to join speakers from EBJIS, EPOS, and ESPID, with different backgrounds, including pediatrics, orthopaedics, radiology, pathology, and infectious diseases. This unique and collaborative faculty will allow us to offer diverse and updated perspectives, bringing pearls and pitfalls of interdisciplinary management that will certainly be useful for all healthcare professionals who take care of children with bone and joint infections.

We encourage you to actively participate in this course, which will enable the European Paediatric Orthopaedic Society (EPOS) to continue leading the way in paediatric orthopaedic education throughout Europe in a stimulating and engaging atmosphere.

See you in Portugal!

Warm regards,

Cristina Alves
EPOS Education Committee
Chair and Course Co-chair

Bartek Kowalczyk
Course Co-chair

Andreas Krieg
Course Co-chair

Dror Ovadia
EPOS President 2025–2026

This course will be delivered in collaboration with the European Bone & Joint Infection Society.
