Bern, Switzerland

Welcome

Dear Colleagues,

One of the goals of European Paediatric Orthopaedic Society (EPOS) is to be leaders in education for Paediatric Orthopaedics in Europe. Childhood diseases may have significant impact throughout adult life with enormous personal, societal and economic costs. Only by having well trained orthopaedic surgeons will it be possible to ensure that the correct treatment is provided to the whole population.

The EPOS Educational Committee has set up the BAT (Basic, Advanced & Traumatology) educational program. The advanced courses are aimed at paediatric orthopaedic surgeons or general orthopaedic surgeons who want to update their knowledge in specific topics in paediatric orthopaedics. In accordance with its pioneering mission to generate and distribute modern information in the field of paediatric orthopaedics, EPOS has decided this year to dedicate its annual advanced course including hands-on sessions on cadavers and sawbones to the early and late surgical treatment of developmental dysplasia of the hip (DDH). So, it is our pleasure to invite you to the EPOS BAT Advanced Course "Hip Surgery from Infancy to Young Adulthood" that will take place on 17-18 January 2019 in Geneva, Switzerland. This advanced course includes theoretical lectures, presentations on surgical techniques in DDH, case discussions, and hands-on sessions on cadavers and sawbones.

The faculty, composed of internationally recognized experts in the field from all over Europe, will spend 1.5 days sharing the most current knowledge through the unique perspective of their experience. Attendees will have a chance to practice techniques in hands-on sessions. The second EPOS BAT advanced course, including hands-on sessions on cadavers in Geneva, will again be organized with the close collaboration of the Swiss Foundation for Innovation and Training in Surgery, Geneva University Hospitals and Geneva University Faculty of Medicine. EPOS is willing to continue this close collaboration with its new educational partners in Geneva in the future. Treatment innovations are often as a result of collaboration between clinicians and industry and our industry partners have and will contribute significantly to the educational content of these courses.

We invite orthopaedic surgeons who are willing to update their knowledge and improve their skills in preventive hip surgery from infancy to young adulthood to Geneva in January 2019. We will do our utmost to meet and exceed your expectations.

Hakan Ömeroglu

Preliminary Program

17 JANUARY 2019 THURSDAY

12.00-12.30	Registration	
12.30-12.55	Mini Buffet (snacks and drinks)	
12.55-13.00	Opening Remarks	H.Ömeroglu, P.Lascombes, J.Czubak
Session 1: Hip Surgery During Infancy		Moderator: H.Ömeroglu
13.00-13.10	Anterior approach open reduction (technique)	M.Ramachandran
13.10-13.20	Medial approach open reduction (technique)	H.Ömeroglu
13.20-13.40	Case discussion	All
13.40-13.50	Discussion	
Session 2: Pelvic Osteotomies in Childhood		Moderator: D.Ceroni
13.50-14.00	Salter innominate osteotomy (technique)	M.Cassiano Neves
14.00-14.10	Dega osteotomy (technique)	J.Czubak
14.10-14.20	Single-incision combined surgery in neglected DDH (technique)	H.Ömeroglu
14.20-14.30	Percutaneous pelvic osteotomy (technique)	D.Ceroni
14.30-14.50	Case discussion	All
14.50-15.10	Discussion	
15.10-15.30	Break	

**17 JANUARY 2019
THURSDAY**

Workshop 1: Pelvic and Femoral Osteotomies

Leaders:
M.Cassiano Neves,
M.Ramachandran

15.30-17.30	Hands-on osteotomies on sawbones (Salter innominate osteotomy, triple osteotomy, proximal femoral derotation osteotomy by i.m. nailing)
-------------	---

Session 3: Periacetabular Osteotomy (PAO) in Adolescents and Young Adults

Moderator:
J.Czubak

17.30-17.40	Principles and indications of PAO	M.Tannast
17.40-17.50	PAO (technique)	J.Czubak
17.50-18.00	Postop regimen and complications of PAO	M.Tannast
18.00-18.20	Case discussion	All
18.20-18.40	Discussion	
18.45	Wrap Up & End of the Day	
20.00	Course Dinner	

Preliminary Program

18 JANUARY 2019 FRIDAY

Cadaver Lab 1: PAO

Leaders:
J.Czubak, M.Tannast

08.00-10.00	Hands-on PAO on cadavers
-------------	--------------------------

Session 4: Surgical Hip Dislocation And Hip Arthroscopy

Moderator:
M.Tannast

10.00-10.10	Principles and indications of surgical hip dislocation	J.Czubak
10.10-10.20	Surgical hip dislocation (technique)	M.Tannast
10.20-10.30	Postop regimen and complications	M.Tannast
10.30-10.40	Hip arthroscopy in adolescents & young adults (technique)	M.Ramachandran
10.40-11.00	Case discussion	All
11.00-11.20	Discussion	
11.20-11.40	Break	

Cadaver Lab 2: Surgical Hip Dislocation

Leaders:
M.Tannast, J.Czubak

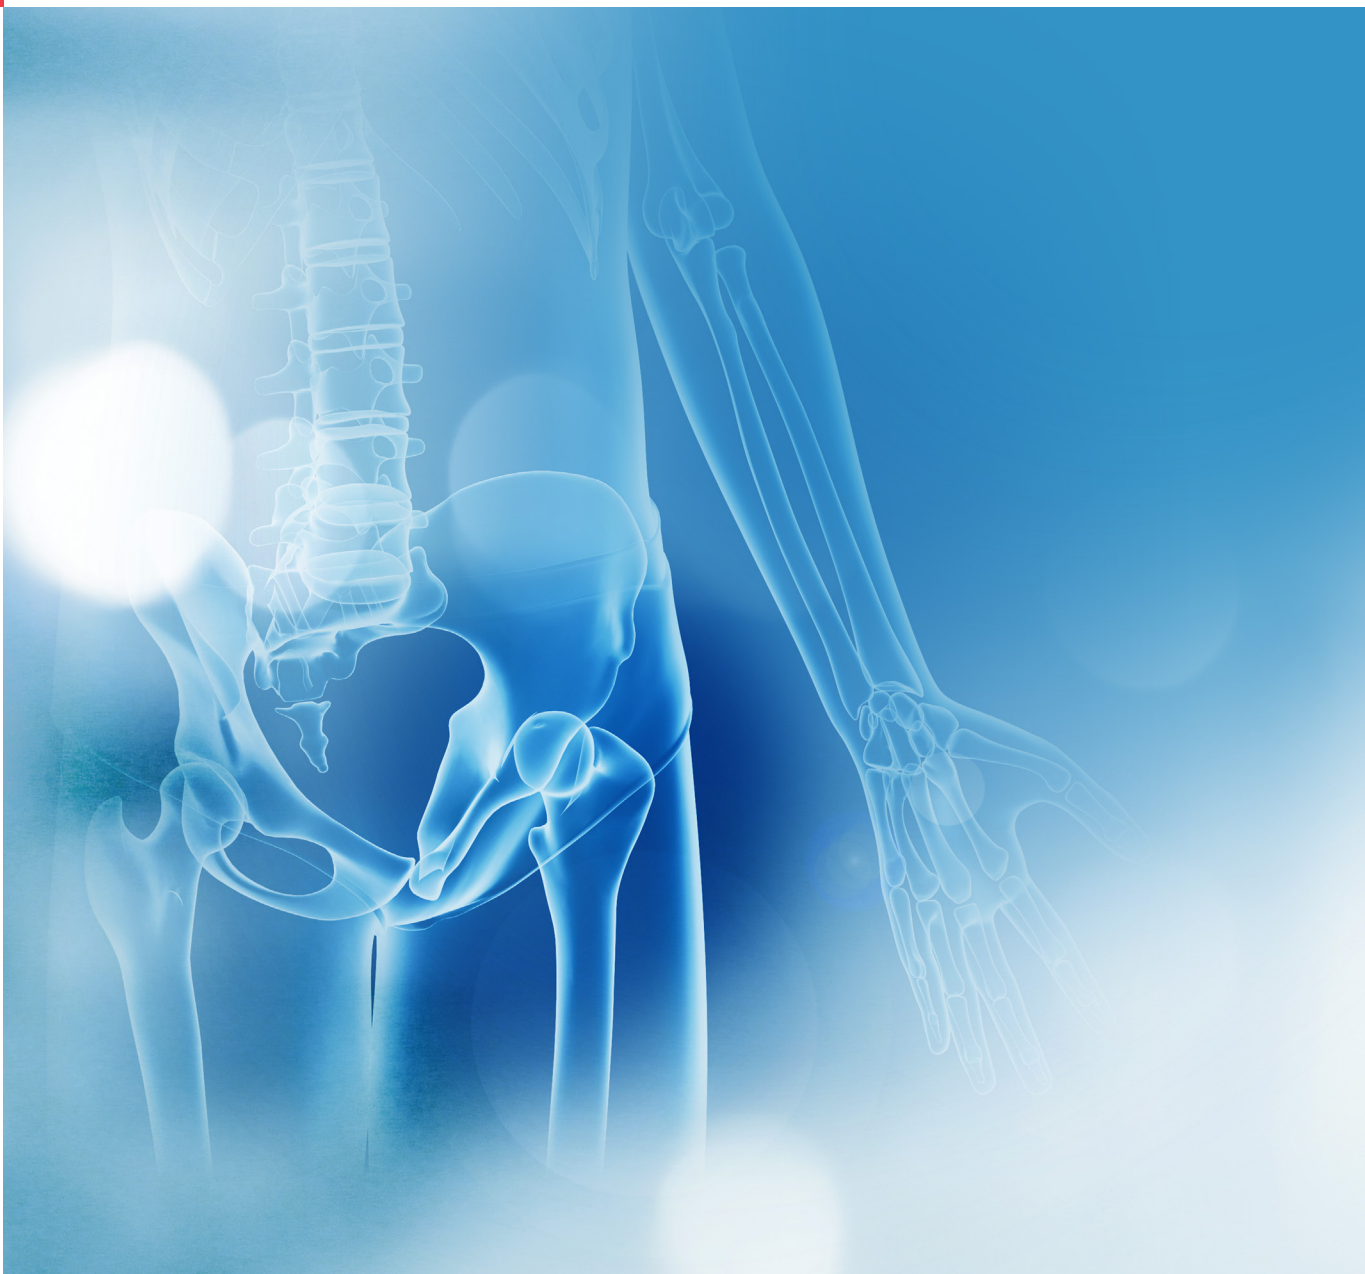

11.40-13.40	Hands-on surgical hip dislocation on cadavers (approach, labral repair, acetabular and femoral neck osteoplasty)
13.40-14.10	Lunch

Cadaver Lab 3: Proximal Femoral Osteotomy

Leaders:
M.Ramachandran,
P.Lascombes

14.10-15.55	Hands-on PFO on cadavers (varus and valgus osteotomies by locking plates)
16.00	Wrap Up & End of the Course
