Congenital Hand Malformations

Dear friends:

The Sant Joan de Déu Hospital has a long history of treating Congenital Hand Anomalies with Joan Minguella until a few years .

Thus we thought this subject of interest for experienced and younger surgeons .

We wish to promote a maximum of discussions on some crucial topics with the great help of some of the most knowledgeable European surgeons : Rolf Habenicht (Hamburg) , Paul Smith (London).

During that meeting , the presentations will cover most of the subject and , as said before , some topics like : Syndactylies , Polydactylies , Thumb Hypoplasia , Microsurgery , will be explored in depth with face to face and discussions .

We hope to see you in Barcelona in March .

A. Gilbert , P. Raimondi , F. Soldado
